Call List

Use this randomly generated list as your call list when playing the game. There is no need to say the BINGO column name. Place some kind of mark (like an X, a checkmark, a dot, tally mark, etc) on each cell as you announce it, to keep track. You can also cut out each item, place them in a bag and pull words from the bag.

1 What is an organism that is able to produce its own food from non-living materials, and which serves as a food source for other organisms in a food chain?  Producers	2 What is a large stream?  River	3 What are plants indigenous to a given area that are well-suited for that environment?  Native Plants
4 What is water that has very little salt content?  Freshwater	5 What is water that flows beneath the Earth's surface in saturated soil or aquifers?  Groundwater	6 What is a rapidly rotating storm system characterized by a low-pressure center, a closed low-level atmospheric circulation, strong winds, and a spiral arrangement of thunderstorms that produce heavy rain or squalls?  Hurricane
7 What is a body of flowing water?  Stream	8 What is the process of changing from a liquid state into vapor?  Evaporation	9 What is an underground reservoir of water that rests in a layer of sand, gravel, or rock that holds the water in pores or crevices?  Aquifer
10 What is something you should turn off when brushing your teeth or hand-washing dishes?  Faucet	11 What is the contamination of air, water, or soil by substances that are harmful to living organisms?  Pollution	12 What is all the land from which water drains into a specific body of water?  Watershed
13 What crop needs 24 inches of water during its growing season?  Corn	14 What is a process used by plants, algae, and many species of bacteria to convert energy captured from the sun into chemical energy that can be used to fuel the organism's activities?  Photosynthesis	15 What is something that is found in nature that is useful to humans?  Natural Resource
16 What is a very large expanse of sea?  Ocean	17 What is the solid form of water, produced by freezing?  Ice	18 What is the natural environment in which an organism normally lives, including the surroundings and other physical conditions needed to sustain it?  Habitat
19 What is the application of water to the land or soil to assist in the growing of agricultural crops and the watering of lawns?  Irrigation	20 What is a form of precipitation in which moisture condensed from the atmosphere falls visibly in liquid drops?  Rain	21 What red fish inhabits inshore and offshore waters along the Atlantic Coast and throughout the Gulf of Mexico?  Red Drum

22 What is a low-lying area where the soil is saturated with water at least seasonally and that supports plants adapted to saturated soils?  Wetland	23 What is a limbless cold-blooded vertebrate animal with gills and fins and living wholly in water?  Fish	24 What is the practice of farming, including cultivation of the soil for the growing of crops and the rearing of animals to provide food, wool, and other products?  Agriculture
25 What is the process of changing from a vapor into a liquid state?  Condensation	26 What land mammal consumes the most water per pound of body weight?  Cow	27 What is something in the bathroom that can be filled up with up to 70 gallons of water? Short showers are the best choice!  BathTub
28 What is a large body of standing water?  Lake	29 What is the high ground where precipitation first collects and flows downhill in tiny trickles too small to create a permanent channel?  Headwaters	30 What is an extended period of below-normal rainfall?  Drought
31 What is a form of water such as rain, snow, or sleet that condenses from the atmosphere and falls to Earth's surface?  Precipitation	32 What is a partly enclosed body of water along the coast where one or more streams or rivers enter and mix freshwater with saltwater?  Estuary	33 What is a small volume of water where even though they're tiny, every bit matters?  WaterDrop
34 What is precipitation, snow melt, or other water that flows onto the land but is not absorbed into the soil?  Runoff	35 What American crop requires the most water?  Cotton	36 What is something that you should run in the kitchen only when it's full? This appliance uses less water than hand-washing dishes.  Dishwasher
37 What is a mobile, destructive vortex of violently rotating winds having the appearance of a funnel-shaped cloud and advancing beneath a large storm system?  Tornado	38 What is trash, such as paper, cans, and bottles, that is left in an open or public place?  Litter	39 What is a place where groundwater flows to the surface of the Earth?  Spring
40 What is a community or organisms together with their physical environment?  Ecosystem	41 What is the system that is able to water your plants in your yard year-round? It is mostly used in the summertime.  Sprinkler	42 What is a type of precipitation in which pellets of frozen rain fall in showers?  Hail
43 What is the chemical formula of water?  H₂O	44 What is a body of water partially enclosed by land that is directly open or connected to the ocean?  Bay	45 What is the cycle by which water circulates between Earth's oceans, atmosphere, and land?  WaterCycle

46

What is the measurement that assesses the cloudiness of a body of water?

Turbidity

47

What is an overflow of water onto normally dry land?

Flood

48

What is the very bright star that heats up Earth and provides energy to our planet?

Sun

49

What appliance uses 40% of a normal household's water use and can be found in the bathroom?

Toilet

50

What is a form of precipitation in which atmospheric water vapor frozen into ice crystals falls in light white flakes?

Snow
